Election/Restrictions

1. **The inventions found in claims 10-13 and 1-9 are related as process and apparatus for its practice.** The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another and materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be practiced by another and materially different apparatus. Specifically, one would not need an apparatus with a vehicle speed sensor, but rather one could use a sensor which measures the angle of the accelerator pedal.

NOTE: Applicant must elect either apparatus (claims 1-9) or process (claims 10-13) above, after doing so applicant must make an election of species below.

2. **This application contains claims directed to the following patentably distinct species:**

- Species I: Figures 1-6, disclose one embodiment of the invention
- Species II: Figure 7, discloses an embodiment in which the vehicle is a four-wheel drive vehicle
- Species III: Figure 8, discloses an embodiment in which the vehicle makes use of a pair-rotor motor

The species are independent or distinct because the species are mechanically different and function in mechanically different fashions.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
